Long Distance Telephone Service

To Make a Long Distance Call.—Call the Local Operator in the usual way and ask for "Long Distance." When the Long Distance Operator answers, give her the following information:

- 1st: Your number.
- 2nd: Your name.
- 3rd: Name of City or Town desired.
- 4th: Number of called telephone, if known.
- 5th: Name and initials of called person or alternate.
- 6th: Street address, or firm name; if number is not known.

Rates and Charges.—Rates for Long Distance service are based upon the initial period. For overtime beyond the initial period additional charges will be made. If, when placing a call, the patron requests the amount of the charge, it will be given after the completion of the conversation.

Classification of Calls and Charges.—Long Distance Telephone Calls and Charges are classified as follows:

A—Station-to-Station Call is one on which a connection is established between any two telephones. On this class of call to a Private Branch Exchange, the Station-to-Station rate is only applicable when communication is established with the operator. If a department or telephone is specified which is connected with a private system the call will be charged the Person-to-Person rate. The person placing a Station-to-Station Call does not specify a particular person to be reached at the called station. Under the Station-to-Station rates a charge is made in all cases where a connection is established with the called station. A Station-to-Station call, if reversed, will be charged the Person-to-Person rate.

B—Person-to-Person Call is one on which the person originating the call specifies a particular person to be reached at the called place. The rate for a completed Person-to-Person call is approximately 25 per cent higher than the Station-to-Station rate.

Orders for Person-to-Person service are accepted only under the condition that a limited charge be made (Report Charge) in the event that the Telephone Company is unable to establish communication for reasons beyond the Company's control.

C—Messenger Call is a Person-to-Person call requiring the services of a messenger to secure a designated person. The rate for this kind of call is approximately 50 per cent higher than the regular Station-to-Station rate. **An additional charge will be made for messenger services.**

D—Appointment Call is a Person-to-Person call on which arrangements are made previously for communication to be established at a specified time. The rate on Appointment Calls is approximately 50 per cent higher than the Station-to-Station rate.

E—Evening Call is a Station-to-Station call completed between the hours of 8:30 P. M. and 12 Midnight. The rate is reduced to approximately one-half of the Station-to-Station rate with a minimum charge of 25 cents.

F—Night Call is a Station-to-Station call completed between the hours of 12:00 Midnight and 4:30 A. M. The rates on these calls are reduced approximately three-quarters of the Station-to-Station day rate with a minimum charge of 25 cents.

In applying Evening or Night rates, the time of day at the originating point shall govern and the time which connection is established shall govern the rate in determining which rate should apply. If a connection is established in one period and terminates in another, the rate in effect at the time communication is established applies to the entire message.

G—Report Charge is a small charge made on Person-to-Person, Appointment and Messenger Calls which cannot be completed for reasons beyond the control of the Company. This charge is **not** made unless a definite report is made for you within one hour after the call is given, or an hour after the expiration of an announced delay. No charge is made for reports that the lines are "busy," "out of order" or "don't answer."

H—Collect Call.—The charges on a call can only be "reversed" provided that such charges be accepted by the called party. Charges can be reversed on Person-to-Person, Appointment and Messenger calls. Reversed Station-to-Station calls are subject to the Person-to-Person rate.

Examples Showing How Rate Charges Are Applied

Assuming that the Station-to-Station initial period rate for service between two certain points was one dollar—the following comparative rates for the various classes of service would apply:

Station-to-Station rate.....	\$1.00
Completed Person-to-Person rate.....	1.25
Completed Appointment rate.....	1.50
Completed Messenger Call rate.....	1.50
(Plus an additional charge for messenger service.)	
Report charge.....	.25
Evening Call rate.....	.50
Night Call rate.....	.25

Are YOU taking advantage of the different classifications of service? Analyze your requirements; you may be able to save money on your Long Distance calls. It is essential that the particular classification you desire to use shall be indicated at the time you place your call.

Following are the proper methods of placing Long Distance calls:

STATION-TO-STATION:

(If the number of the telephone desired is not known.)

"This is a Station-to-Station call. Main 678, James Smith, calling Blank City, Illinois. I wish to speak with **anyone** in John Brown's Office in the Illinois Building."

(If the number of the telephone desired is known.)

"This is a Station-to-Station call. Main 678, James Smith, calling Blank City, Illinois. I wish to speak with anyone at Franklin 1453."

PERSON-TO-PERSON:

"This is a Person-to-Person call. Main 678, James Smith, calling Blank City, Illinois. I wish to speak with John Brown, Franklin 1453, Illinois Building." Give the operator the number of the telephone you desire to reach if you know it.

THE EVENING and NIGHT service is particularly attractive to persons who are out of the city and desire to communicate with their homes.

General Information

The Telephone Company desires to render the best telephone service possible; the telephone patron desires to receive the best telephone service possible. One of the most important factors of good service is a better and wider knowledge on the part of our subscribers and patrons of the best method of using the service. The data on this and following pages contains valuable information and suggestions, a study of which will help you to use your telephone more efficiently.

Directory.—The Telephone Company assumes no liability whatever for damages arising from errors or omissions in the making up or printing of this book. The utmost care is used, however, to list all subscribers correctly.

Moves.—If you desire your telephone moved, please call at the Contract Department and sign a contract for your new location. The telephone will be moved on or as near the date designated as possible, providing ten days' advance notice is given.

Names of Non-Subscribers.—Members of the same firm and members of the same family who are not subscribers to telephone service, may, with the consent of the telephone subscriber, have their name listed in the telephone directory. A moderate charge is made for such extra listings.

Telephone Numbers.—All telephone numbers are the property of the Telephone Company. Inasmuch as it is sometimes necessary to change subscribers' numbers, the Company reserves the right to change any number. Patrons are advised therefore not to place their telephone numbers on letterheads, cards or wagons. The words "Bell Telephone" will answer all purposes and may save you considerable annoyance and expense.

Directory Advertising.—This Company has opened limited space in its Directories to clean and legitimate advertising. The rates are very reasonable when the enormously large circulation and the class of circulation of these Directories is considered. For information as to space and rates call "Manager's Office."

Profane and Obscene Language is against the law and will not be tolerated over the lines of this Company, and this Company reserves the right to remove, without notice, the telephone of any subscriber violating this rule.

Telephone Attachments.—Telephone instruments have been designed to produce the best results obtainable, and are, necessarily, very sensitive and intricate. The various devices offered for sale and which are claimed to improve transmission, eliminate noise, destroy germs, supplant the Telephone Directory, etc., are unnecessary. Many of them get the telephone lines and instruments into trouble and the Company, to protect the service, is compelled to remove them.

Subscribers' contracts provide that no instrument or appliances not furnished by the Company shall be attached to or used in connection with its instruments or lines.

How to Use the Service

Use the Directory of Latest Issue to avoid wrong numbers. Trying to remember numbers often results in mistakes and delays.

Spell Out All Numbers, one figure at a time. For Main 1375, say "Main—one three—seven five."

Speak Distinctly in a moderate tone of voice directly into the transmitter with the lips close to the mouthpiece.

Answer Your Bell Promptly. Don't make your patrons and friends wait unnecessarily.

While the Bell is Ringing do not remove the receiver from the hook; it may interfere with the signals.

To Recall the Operator, move the hook slowly up and down. Rapid motions will not operate the signals.

Be Brief but Courteous to the Operators. They have no time to converse.

Call "Information" for names not listed.

Call "Chief Operator" to report unsatisfactory handling of your calls.

Call "Repair Clerk" when your telephone is out of order.

Visit Our Plant and see it in operation. Visitors are welcome at any of our Exchanges any week day between 9 a. m. and 5 p. m. A card of admission will be furnished in the office of the Manager.

Telephone Attachments

ARE being peddled in a miscellaneous manner throughout the country and are purchased by unsuspecting or unthinking users and attached to their instruments. Generally the so-called "helps," disinfectants, etc., are a positive hindrance to telephone service, not being so designed as to secure the maximum of efficiency in hearing or speaking.

Many of them get the lines and instruments into trouble, whereupon the Company, to protect its service, is obliged to remove them. Rubber ear-piece attachments do not augment the sounds received, and often make it impossible to hang the telephone properly on the switchhook. Essentially the same result can be obtained by closing one ear with the palm of the hand. The instruments should be kept clean by wiping them.

Telephone instruments, necessarily very sensitive and intricate, have been designed to produce the best results as they are. In the interest of good service subscribers are recommended to make no attachments of any kind to their instruments.
